

Chetan Tiwari

Software Development Engineer | Python · FastAPI · React · TypeScript | Backend Systems & AI-Native Applications

📞 7007113884 | ✉️ tiwarichetan212@gmail.com | 🌐 chetan56tiwari | 📱 ChetanTiwari195 | Bengaluru

Technical Skills

Languages	Python, TypeScript, Go (Golang)
Backend	FastAPI, Django, GraphQL, Kafka, Temporal
AI & ML	LLM Integration (OpenAI, Claude), RAG, MCP, LangChain
Frontend	React.js, Next.js, Tailwind CSS
Databases & DevOps	PostgreSQL, Redis, Docker, CI/CD, AWS (EC2, S3, Lambda, Bedrock)

Professional Experience

FinBox

Software Engineer

Sep 2025 – Present

Bengaluru

- Owned end-to-end backend delivery for **4 lender loan journeys** (Axis Finance, Hero FinCorp, L&T Finance, Aditya Birla Finance) on FinBox's Journey Studio platform, each spanning **50+ API integrations** and **500+ workflow nodes**.
- Cut lender journey build time from **2+ months to 3–4 weeks** by driving adoption of configuration-driven workflows and reusable **Go Activities** in place of custom per-lender backend code.
- Designed and implemented reusable **Go Activities** (PAN fetch, bureau fetch, velocity checks, Udyam fetch, data/event switches) used across **10+ lender integrations**, eliminating duplicated integration logic.
- Orchestrated long-running lending workflows with **Temporal**, handling asynchronous lender callbacks, retries, and idempotent state transitions across **20+ webhook integrations**.
- Built **Seedhe Mock**, an internal API virtualization platform (python/FastAPI backend, React.js frontend, PostgreSQL, Docker on AWS) end-to-end; adopted by **10–20 engineers** across 2–4 teams, cutting mock/API setup effort to **~20–30%** of the prior process.
- Owned **L1 production support** for lender integrations and Temporal workflows — diagnosed failures via DB queries and logs, executing fixes and redeployments within scope.

Cronbay Technologies Pvt. Ltd.

Full Stack Developer

May 2024 – Sep 2025

Bengaluru

- Delivered **4 production-grade web applications** end-to-end using **React/Next.js, Tailwind CSS, Python (FastAPI)**, and **PostgreSQL** — including a full-featured **heavy machinery e-commerce store** with a dedicated **admin dashboard** (inventory management, lender product approvals, blog CMS, restocking), driving **30% revenue growth**.
- Overhauled legacy frontend by migrating to **Next.js**, improving page response time and UI fluidity, resulting in **50% increase in user retention**.
- Migrated legacy **PHP/Laravel** backend to **Python (FastAPI & Django)**, cutting API response times from **10–15s to 1–2s** — a **7–10×** latency improvement.
- Hardened all platforms with **JWT authentication, OAuth2**, refresh token rotation, RBAC, and HTTPS enforcement, eliminating unauthenticated access vectors across the entire product suite.
- Built **LLM-powered lead generation automations** using **n8n** and **Apollo.io APIs** — automatically fetching leads, storing them in Excel, and dispatching AI-personalized outreach emails, increasing company outreach by **73%**.

Projects

AI Resume Optimizer – Chrome Extension

React.js, TypeScript, Python (FastAPI), OpenAI, Claude, REST API

Aug 2026

Chrome Web Store

- Engineered a **full-stack Chrome Extension** with a React.js + TypeScript frontend and async **FastAPI** REST backend; parses **PDF and LaTeX** resumes via NLP-based keyword extraction, compares against live job descriptions, and delivers a **keyword gap analysis** (present vs. missing) to guide targeted resume edits.
- Leveraged **OpenAI and Claude APIs** with **function calling** for deterministic structured JSON output; achieved **30–50% average ATS score improvement**, directly increasing interview shortlist rates for end users.

Education

IIIT Bangalore

Executive Diploma in Machine Learning & Artificial Intelligence

2026–Present

HKBK College of Engineering

Bachelor of Technology, Computer Science and Engineering

2020–2024
